

Housing Stability Grant

July 01, 2024 – June 30, 2025 · Example State Housing Trust Fund · Prepared by Program Data & Evaluation Team · August 01, 2026

Executive Summary

During the reporting period (July 2024–June 2025), Housing Stability Grant programs enrolled 260 clients across 260 households (472 individuals). Of 145 exits, 93 (64.1%) were successful and 93 (64.1%) went to permanent housing. Median household income change at exit was \$0, with 46.8% of households increasing income. 5 of 5 performance measures met their targets. Headline: 64.1% of the 145 exits this period were successful, against 5 tracked measures (5 met, 0 missed).

Headline Results

260 Enrollments	260 Households	472 Individuals	145 Exits
64.1% Successful exit rate	64.1% Permanent housing rate	\$0 Median income change	85 Data quality (B)

Not yet submission-ready. 5 blocking data quality issue type(s) must be resolved: Missing required fields (4), Missing exit destination (3), Duplicate client enrollment (6), Unknown program (2), Exit before enrollment (3).

Performance Measures

Measure	Target	Actual	Status
Permanent housing exit rate	60.0%	64.1%	Met
Households increasing income at exit	40.0%	46.8%	Met
6-month follow-up completion rate	70.0%	97.2%	Met
Assessment completion rate	90.0%	98.8%	Met
Exit plan completion rate	85.0%	97.9%	Met

Performance Measures: Goal vs. Actual

Program Comparison

Program	Enrolled	Exits	Successful	Permanent housing
Rapid Re-Housing	109	60	76.7%	76.7%
Emergency Shelter	101	56	44.6%	44.6%
Permanent Supportive Housing	48	28	78.6%	78.6%

Outcome Rates by Program

Key Findings

- 260 enrollments across 3 program(s) served 260 households (472 individuals: 327 adults, 164 children).
- 145 clients exited (55.8% of enrollments); 93 were successful exits (64.1%) and 93 went to permanent housing (64.1%).
- Among 139 exits with complete income data, median income change was \$0 and 46.8% of households increased income.
- 5 of 5 performance measures met their targets.
- Enrollments are up 0.0% month-over-month in the most recent month.
- Enrollment peaked in 2025-03 (34) and was lowest in 2024-10 (18).

Risks & Concerns

- Emergency Shelter trails on successful exits (44.6% of 56 exits); review exit planning and destination documentation.
- Overall data quality score is 85.1/100 (grade B) across 263 records.
- Blocking: Missing required fields affects 4 record(s) — Required fields defined by the grant profile are empty. Reports built on incomplete required data may be rejected by the funder.
- Blocking: Missing exit destination affects 3 record(s) — Exited clients have no destination recorded. Housing outcome measures (including permanent housing rate) exclude these exits.

Recommended Actions

- Complete the 12 overdue follow-up(s); follow-up completion is a funder performance measure.
- Fix duplicate client enrollment (6 record(s)): Keep one record per client per enrollment; merge or delete the duplicates.
- Fix exit before enrollment (3 record(s)): Check both dates against case notes and correct whichever was mis-entered.
- Fix missing required fields (4 record(s)): Fill in the missing values from case files or the source system, then re-upload.
- Fix overdue 3-month follow-up (4 record(s)): Contact the flagged clients to complete the 3-month follow-up, and record the completion date.

Methodology & Limitations

Metrics are calculated deterministically from the uploaded extract using the "housing_stability" profile; duplicate enrollments are removed before analysis and outcome definitions come from the profile's destination mappings. AI narrative, when enabled, is generated from these pre-calculated metrics and performs no arithmetic.

- 3 duplicate enrollment record(s) were excluded from analytics.
- 3 household(s) had missing or implausible household size and were excluded from individual counts.
- Income change is based on 139 of 145 exits; the rest were missing or had invalid entry/exit income.
- Blocking data quality issues were present at generation time; affected metrics may be understated (see the Data Quality section).
